FREDC

Growing Towards the Direction of
 MAKE IN INDIA (MII)

**FRED VARIANTS
 SHARING THE SAME POWERFUL DNA!**

*"700+ INSTALLATIONS IN INDIA
 ACROSS ALL DIGITAL FORENSIC LABS"*

A FRED for Every Application

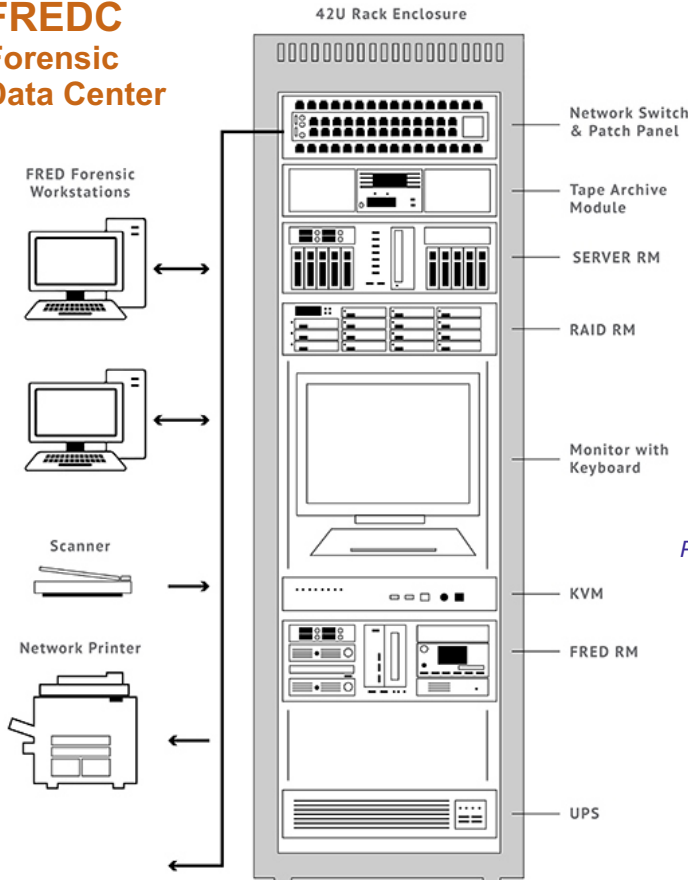

**One of its Kind.
 Built to Perform.
 Case After Case.
 Year After Year!**

FORENSIC WORKSTATIONS AND SERVERS
FRED - Forensic Recovery of Evidence Device

FRED systems are optimized for stationary laboratory acquisition, analysis, case management and reporting. FRED systems set the standard for forensic acquisition analysis workstations. The quality, features, performance, and overall capability are second to none. Buying a FRED system means making an investment in your ability to investigate cases with utmost ease. FRED systems help forensic examiners world-wide work smarter, faster and with more success. Put the power of FRED to work for you today. FRED workstations are equipped with powerful Intel i9/ Intel Xeon/ AMD processors, providing more power and versatility.

Additionally, they are the only Forensic Workstations in the world to have a Touch Screen interface integrated with a Write Blocker and simultaneous imaging feature.

**FREDC
 Forensic
 Data Center**

**ONE STOP CENTRALIZED SOLUTION FOR
 HARD DRIVE & MOBILE FORENSICS etc.
 WITH ENOUGH STORAGE TO HOLD YOUR
 DIGITAL DATA FOR A DECADE!!**

Digital Forensic Data Server & Complete Forensic Network Infrastructure. Powered by Intel Xeon W5-3435X CPU with 16 cores, 3.1 GHz / 4.7 GHz, 45 MB cache.. 16, 28, 36, and 56 core upgrades available with 128 GB DDR5 RAM (upgrades to 256, 512, 768 & 1536 GB) Storage option of 240 TB (upgrade available upto 1.9 Peta Bytes in Single Rack & up to 9.1 Peta Bytes with additional racks) Extremely fast data transfers with dual 10 GbE network connections

Purpose-built, high performing department Forensic Data Center.

By design, FREDCs are perfect systems for Direct To Network forensic imaging. Share Software Licenses/ Dongles. Lower your Software expenditure/ Maximize usage. Store all case data from anywhere in your Lab directly to FREDC for Archival purpose. Centralized Storage, Centralized Administration, Centralized Security, & Centralized Backup. Modular & Expandable RAID Module for Fault-Tolerant storage of Evidence & Case Data.

The Ultrakit Contains:

SATA/ IDE Write Blocker, SAS Write Blocker, USB Write Blocker, PCIe Write Blocker, Forensic Media Card Reader, Firewire Write Blocker, Forensic Duplicator and all cables, connectors and adaptors you would ever need in Portable field form and in Ruggedized Pelican Case. Multiple Separate Write Blockers for separate drive interfaces.

Portable Write Blocker Kit

Ultrakit V5

High-end Forensic Imagers

Superior local and 10 GbE network imaging performance without compromises
 Images SATA, USB 3, PCIe, SAS, FireWire 800, IDE (with optional IDE Adapter), and network shares
 Outputs to SATA, USB 3, SAS, and network shares
 Supports up to two active "forensic" jobs at a time (simultaneous imaging)
 Job queuing option for efficiency and convenience
 Up to four destinations per source with the ability to mix clone/image duplication and local/network destinations
 Media Utility options of: view drive details, wipe, format, blank check, view & disable HPA/DCO, whole disk encryption, view S.M.A.R.T., and eject media

TX1 Forensic Imager

BRAND MEDIA SUPPORT

WRITE ARREST - ALL IN ONE WRITE BLOCKER - MAKE IN INDIA INITIATIVE

The Write Arrest is Portable All in One Write Blocker that supports forensic acquisitions of SATA, SAS, USB 3.0, Pcle, FireWire 800/400, and IDE interface.

Supports all modern forensic imaging software at a SuperSpeed USB 3.0 Image all Latest SSD using One Portable Write Blocker packed in a rugged pelican casing with all Latest Drive, Adapters and Connectors.

High-end Forensic Imager Solution

Dual OS - Linux, Win 10
 Plugged 2 M.2 NVMe Ssd with 2 vertical adapters and special SSD locking mechanism + 2 SATA drives

SuperImager Plus 12" NVMe- A Portable Rugged Forensic Imaging Unit with a Thunderbolt 3.0 port

Configured with **Dual Open OS of Linux** for multiple simultaneous parallel and independent of forensic imaging with extreme performances and **Windows 10** for **full forensic investigation, includes Forensic Analysis, Triage, and Cellphone data extraction.**

The unit is a Portable, Compact, easy to carry when travelling, large 12" display, and an extremely performing hardware (**NVMe 187GB/min**). It is built with the latest generation of i7 CPU, and with 2 NVMe U.2 ports (supports both U.2 and M.2), 2 SATA ports, 4 USB3.1 ports, and one Thunderbolt 3.0 port (40 Gigabit/s) that enables the unit to expand or connect to **10 GbE network.**

Field Incident Response/ Triage Kit - VPER KIT

(Versatile Preservation & Examination Responder Kit)

The VPER kit is configured to ensure you are always prepared for the next forensic challenge. At the core of each VPER kit is a High-end Forensic Laptop. It also includes set of Write Blockers, a Forensic Duplicator or Imager, the Forensic Card Reader, adapters, cables, power supplies, and assorted tools.

High-End Forensic Laptop

VPER kit with Forensic Imager

DIGITAL FORENSICS ACCESSORIES AND ADAPTERS: HAVING THE RIGHT ONE AT THE RIGHT TIME IS MOST CRUCIAL

Latest PCIe SSD Adapter
 New & Latest SSD Adapters. **NEED OF THE HOUR!!**

SATA LIF HDD ADAPTER

SATA ZIF HDD ADAPTER

BLADE TYPE SSD ADAPTER

PCIe Apple SSD ADAPTER

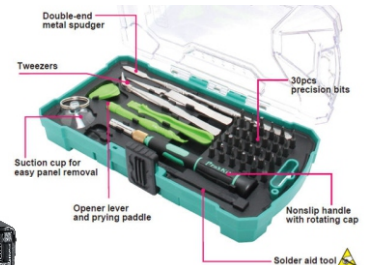

USB 3.1 PCIe SSD Write Blocker Kit

PCIe Adapter for Firewire Devices

USB 3.2 Enclosure with R/W Switch

Precision Electronics Tool Kit is a complete comprehensive standard in Digital Forensics

PASSWORD DECRYPTION & RECOVERY

PASSWARE KIT FORENSICS

& Many More...

PASSWARE KIT MOBILE

is a state-of-the-art forensic tool that bypasses lock, extracts and decrypts data from mobile devices.

APPLE DEVICES

iPhone 7, 7 Plus, 6S, 6S Plus, SE, 6, 6 Plus, 5C, 5, 4S, iPad Air 2, iPad 7th Gen, iPad Mini, iPad Pro

PASSWARE KIT ULTIMATE

is a versatile software tool for recovering lost or forgotten passwords and decrypting password-protected files and data.

INCLUDES - Passware Kit Forensics
Passware Kit Mobile
Passware T2 Add-on

ANDROID DEVICES

Huawei - HiSilicon Honor Kirin, MediaTek, Qualcomm
LG - MediaTek, Qualcomm
Samsung - Exynos, Qualcomm, MediaTek, Unisoc
Xiaomi - MediaTek, Qualcomm
Lenovo, Nokia - MediaTek, Qualcomm, Unisoc
Other - Oppo, Vivo, Motorola, Alcatel, Meizu, Doogee, Blackview, Gionee, HTC, Sony, OnePlus, Infinix, IteL, Meizu, TCL, ZTE

- Password recovery for 350+ file types
- Recovery of passcodes for mobile devices
- Decrypts Macs with Apple T2 Chip
- Full disk decryption
- Hardware acceleration
- Live memory analysis

Comino DPR FT - World's Best Digital Password Recovery Machine

**More GPU CUDA cores
Faster Recovery Rate**

We all protect Important Data with Passwords, and so do Criminals!!!
With Comino's GPU, PASSWORDS are the Problem of the PAST!!!

Endless Scope of Digital Evidence which can be recovered from Password Protected files.

Comino DPR FT is Top of the line, Ultra-compact, liquid-cooled Hardware for Password Recovery and Decryption. Saves your precious time and resources. A must have HARDWARE for LEAs.

RFID SOLUTIONS

- OffGrid faraday bags are designed to block all electronic signals
- RFID
 - FM RADIO
 - GPS
 - CELLULAR
 - BLUETOOTH
 - WIFI

Protect yourself against any potential security breaches with an OffGrid faraday bag. The OffGrid faraday bag makes it impossible for hackers to steal your personal information by shielding your electronic devices from GPS, Wifi, Bluetooth, 5G, RFID, and all other wireless technologies.

RF Shielding / Faraday Box

Features:

- High RF Shielding.
- Easy opening/Closing of Door.
- Easily Field replaceable Rear I/O modules.
- Dual Ventilation For Cooling.
- RFID device testing.
- Ideal for 802.11a, b, g, n, ac.v

MADE IN INDIA

**You've already been CLONED into your Mobile Phone!!
The smoking gun in Mobile Forensics Investigation!!**

MSAB

Immediate Extraction Solution for the front line personnel Rapid access to digital evidence for front line personnel On-the-Spot Access to Digital Evidence and Intel.

MOBILE FORENSICS

Cellebrite

Cellebrite Advanced Extractions & Unlocks

Advanced solution to easily overcome the challenge of accessing mobile device evidence

Cellebrite UFED
The industry standard for accessing mobile data.

Cellebrite UFED Cloud
Lawfully Access Cloud-Based Evidence to Accelerate Investigations

Cellebrite Physical Analyzer
From encrypted data to actionable intelligence

Cellebrite Inseyets

Everything your examination requires. All in one solution for access, extraction, decoding, review, management, automation and triage.

Digital Collector

A powerful forensic imaging software solution to perform triage, live data acquisition and targeted data collection for Windows and Mac computers.

Magnet Graykey can provide same-day access to the latest iOS and Android devices – often in under one hour.

Swiftly process and analyze vast amounts of images and videos. Stay ahead in investigations with powerful analytics and collaborative capabilities, gaining a crucial edge in digital media

MAGNET AXIOM

Recover & Analyze Your evidence in One Case

Magnet AXIOM is purpose-built to recover, process, and analyze digital evidence from a variety of sources regardless of whether you use AXIOM or third-party tools to acquire your data.

MOBILE

Recover data from iOS and Android devices with the artifact first approach of AXIOM to get the most relevant evidence for the most popular applications

COMPUTER

Recover deleted data and analyze evidence from Windows, Mac, Chrome and Linux Devices including browser history and deleted files.

CLOUD

Process and examine data from warrant returns, user-generated archives, and live cloud services, with artifacts from 50+ of the most popular cloud services.

INTERNAL AND CYBER INVESTIGATIONS

MAGNET AXIOM CYBER

Simplify Your Corporate Investigations

MAGNET WITNESS

Streamline Your DVR Video Recovery and Analysis

MAGNET IGNITE

Quickly determine if data has been exfiltrated from an endpoint

MAGNET OUTRIDER

Quickly triage devices while in the field

Magnet Digital Investigation Suite - MDIS

Transform your digital investigations with powerful analytics and collaborate agency wide, securely and at scale.

MAGNET AUTOMATE

Finish investigations faster by automating your workflow

MAGNET REVIEW

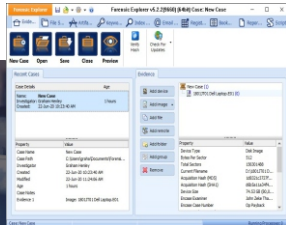

Analyze digital evidence from your browser

MAGNET ATLAS

Organize cases and maintain the chain of custody

Seek Justice. Protect the Innocent.

GetData

- File System Analysis
- Keyword & Index Search
- Live Boot Virtualization
- RAID Rebuilding
- Email
- Registry
- Report

Quickly process large volumes of data, run Triage Profile, automate complex investigation tasks, produce detailed reports and increase productivity.

Recover, analyze and report data from physical disks or forensic image files. Discover user activity with simple search, filter and analysis option. Effective for new or experienced forensic investigators.

EMAIL ANALYSIS & eDISCOVERY

The ideal email investigation and eDiscovery software tool for single users who need to process, search, filter and produce amounts of ESI beyond 250 gigabytes. Intella PRO does not have a processing limit and designed for corporate investigators, professional services firms, and consultants.

Key features of Intella Pro

Intella Pro also features the powerful search engine and unique visual presentation that has made Intella popular. Investigators can quickly and easily process, search, review, and analyze email and ESI. The easy to use interface and Cluster Map allows analysts to quickly find critical data, visualize relevant relationships, and drill down to the most pertinent data.

Intella Pro is an Ideal Solution for

- Individuals with varying backgrounds and skill levels searching for an efficient way to analyze unstructured data
- Organizations with case sizes of varying sizes who do their own internal investigations
- Investigators, analysts, and reviewers who process, search, and filter large amounts of email data

- Cluster map technology
- Social link graphs
- Load file import and export
- Email threading
- MD5 Hash filtering
- Analyze mobile device data

VIDEO FORENSICS

ACQUIRE | ANALYZE | ENHANCE | AUTHENTICATE

- Image Clarification/ Enhancement, Annotation
- Vehicle Detection & Classification
- Object Analysis
- License Plate Detection
- Multiple Algorithms Video Processing
- Timeline Support
- Face Recognition
- Face Detection
- Identify People Wearing Masks
- Image Authentication
- Reporting

Comprehensive and Trusted Solution to Accelerate your CCTV/ DVR/ NVR recovery Analysis

SPOTLIGHT REDACTION AND FORENSIC ENHANCEMENT
Forensic Studio

Identify Faces.

In an ideal scenario, clear HD videos with well-lit subjects directly facing the camera are perfect. However, real videos often lack such perfection due to shadows, shake, and uncontrollable factors. Forensic techniques swiftly recover lost details, creating court-ready, reproducible videos.

Read license plates.

Improving CCTV license plates is crucial but often tedious. A clear plate can aid in capturing suspects. Issues like low res, compression, blur, and lighting affect readability. Forensic helps with quick fixes, using patented algorithms for resolution, lighting, contrast, and deinterlacing.

Recover lost details.

Unlike other software, Forensic enhances moving and still objects in dynamic scenes. Its patented super-resolution algorithms analyze neighboring frames to reconstruct higher-resolution images. This scales up videos, adding detail and reducing compression artifacts.

Video Authentication Platform that provides investigators and prosecutors new insight into digital video.

- Authenticate citizen-submitted video to identify which files are camera original and which files have been downloaded from social and file sharing platforms, or which were generated with video editing tools.
- Develop investigative leads by identifying camera make and model of acquired video.
- Solve cases that involve video evidence faster and with more accuracy.
- Prove or disprove that evidence is reliable and has not been unexpectedly edited or tampered with.
- Identify deepfakes, synthetic media, and generative AI.

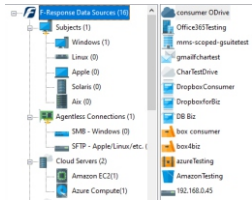

F-Response Collect (COL) is a server-based product designed to facilitate the creation of images of remote data from Windows, Linux, and Apple mac devices from virtually anywhere.

F-Response Enterprise (EE) is a dongle-based solution that permits many machines to be examined simultaneously over a network, and facilitates "stealthy" deployments for covert operation.

F-Response Consultant (CE) is a solution that permits many machines to be examined simultaneously. GUI-based target code is executed on each machine to be examined.

F-Response Consultant+Covert (CE+C) has all the features of Consultant edition plus a covert feature.

F-Response TACTICAL (TAC) is an intuitive, easy to use, GUI-based point solution that permits an examiner to review one machine at a time. A matched dongle pair facilitates the automatic connection between the Examiner and Subject computers.

breadcrumbs Investigate Crypto

Breadcrumbs is a community-powered blockchain analytics platform turning blockchain data into information that matter to you.

Breadcrumbs is actively used by law enforcement agencies and regulators around the world, and is an essential tool to triage leads, seize/recover funds and solve crypto crime quickly and effectively.

Cyber Crime Investigation and Analysis Software

Most advanced and customized for Indian LEAs - CALL DATA analytics solution

Provides integrated results with advanced visual analytical interface.

C5 CDR/ IPDR ANALYZER

Digital Forensics as a Service (DFaaS) Offered

"With Emerging Technologies and Advanced Solutions"

- FORENSIC IMAGING/ CLONING
- FORENSIC EXTRACTION, CARVING & INDEXING
- FORENSIC DATA ANALYSIS
- FORENSIC REPORTING
- FORENSIC AUDITING & ACCOUNTING

- DIGITAL FORENSIC WORKSTATIONS & WRITE BLOCKER KITS
- HARD DRIVE & MOBILE/ HANDHELD FORENSICS SOLUTIONS
- PASSWORD RECOVERY/ DECRYPTION TOOL
- NETWORK/ LIVE/ CLOUD/ CRYPTOCURRENCY FORENSICS
- CCTV/ DVR VIDEO ACQUISITION, ANALYSIS AND ENHANCEMENT SOLUTIONS

Our Team & Expertise

"Putting the best foot forward, always without fail"

International Certification Training Offered

"Building Bridges with Proven Track Records & Strong Customer Base"

BASIC | INTERMEDIATE | ADVANCED

-  Magnet Certified Forensics Examiner (MCFE)
-  MSAB Mobile Forensics XRY & XAMN Certifications
-  MSAB Mobile Forensics Advanced Acquisition
-  MSAB Mobile Forensics Advanced App Analysis (AAA)
